YAKSHA HEALTH APP WITH TYPESCRIPT AND PLAYWRIGHT PL1-5

Use case summary

Project Name: https://yakshahrm.makemylabs.in/orangehrm-5.7 app – HR management system.

Use Case Summary: https://yakshahrm.makemylabs.in/orangehrm-5.7 is designed to manage Employee records.

Records (HRMS). It allows users to view, search, and manage employee records. It features functionality such as adding/editing employee details, filtering data by department and role, and exporting records. The primary use case is to automate the process of employee data management, ensuring efficient and reliable operations for human resources teams in organizations

Technology Stack:

• Automation Tool: Playwright (for testing)

- **Key Features:** Patient Record Management: Add, edit, and delete Employee records.
 - Filtering and Search: Search Employee records by date range, name, department, and
 - **Export Functionality:** Export records for offline access.

Expected Outcomes:

- Automate key HR operations like employee record handling, filtering, and validation.
- Ensure the accurate retrieval and modification of employee records, enhancing operational efficiency.

Overview of the application

Pages/Features that are to be focused for the application

Please use the Application URL https://yakshahrm.makemylabs.in/orangehrm-5.7

PROBLEM STATEMENT

Need to automate the following activities using playwright+typescript

You will be given a few Json files in the Data folder login.json.

Path	File	Description
src\data	login.json	 Contains data to read from a json file.

Here's a detailed table format for the test cases to be tested

Test Case No.	Test Case Name	Test Steps to be performed	Path & Method Used	Expected Result
		1. The application should read the data from the login.json file and fetch the user's name and password.	Reference path	
	Verify Image	2. It should be called the method performLogin() and myinfo().	\src\pages\MyInfoPage methods	
1	could be	3. Perform the myinfo method from MyInfoPage and	myInfo()	image should get replaced
	Uploaded as profile Pic	perform the pic upload and set as profile pic. 4. Verify profile pic should be updated.	You can use the highlightElement method present in CommonMethods file to highlight the element before performing any action on it. It takes the locator as a parameter.	
		It is must implement this login functionality at first and then implement any other test case.	focutor us a parameter.	
2	Ensure admin can access Job Categories	 Click on admin page Opens the Job Sub-tab Select the job categories option 	Reference path \src\ pages\AdminPage methods AdminEdit() You can use the highlightElement method present in CommonMethods file to highlight the element before performing any action on it. It takes the locator as a parameter.	Confirms that the Job Categories page is displayed, indicating successful navigation
3	Verify admin userna me sort button toggles to	1.Login using valid credentials2. Click on "Admin" tab in sidebar3. Click on the sort icon next to the "Username" column.	Reference path \src\ pages\AdminPage methods sortUsernamesAsc()	List should get sorted accordingly to ascending (bi-sort-alpha-down), indicating successful

	ascendi ng		You can use highlightElement method present in CommonMethods file to highlight	sort toggle.
			the element before performing any action on it. It takes the locator as a parameter.	
			Reference path \src\ pages\AdminPage	
4	Verify new Tab opens on clicking the "Upgrade" button	1. Navigates to the Admin section. 2. Click the upgrade button. 3. Waiting for a new tab to open. 4. Retrieves the URL of the newly opened tab.	ungrade∩	PicUpgrade to advance tab should open
5	Validate tooltip visibility on hoverin g over 'Help' button	 Navigates to the Myinfo section Hovers over the 'Help' button located in the top bar Waits briefly to allow the tooltip to appear Retrieves the tooltip text using the 'title' attribute Passes the text for validation to confirm tooltip visibility and content 	incipilovel ()	Ensures that helpful contextual information is displayed when users hover over the help icon.
6	Confirm admin can access Module Configuration	 6. Login using valid credentials 7. Click on "Admin" button in sidebar 8. Navigates to admin section 9. Opens the configuration tab 10. Select the module sub-tab 	, u o ,	Confirms that the "Module Configuration" page is displayed

			Reference path	
7	Validate photo sharing functionalit y with confirmatio n message	 Navigates to the Buzz page Click the "Share Photos" button Enters a unique comment with a timestamp Uploads an image file from local storage Submits the post Reloads the page to reflect the new post 	\PageObjects\Pages\BuzzPage methods SharePhotoPost()	Ensures user can successfully share a photo post
8	Verify 'Most Commented Posts' tab selection	 Navigates to the Buzz section Click on Most Commented Post tab Verifies that the tab has active class applied 	Reference path \src\pages\BuzzPage methods mostCommentTab()	Verifies that the tab has the active class applied
9	Ensure comment can be successfully added to a post	6. Collects all comment elements on	Reference path \src\ pages\BuzzPage methods addCommentToPo st(). You can use the highlightElement method present in CommonMethods file to highlight the element before performing any action on it. It takes the locator as a parameter.	Ensures the comment submission flow is working correctly and the UI reflects the new comment as expected.
10	Verify post content can be edited successfully	3. Selects the edit option 4. Clears the existing post content 5. Fills in the new predefined post content (editPostText) 6. Saves the updated post 7. Verifies that the post now displays the updated content	Reference path \src\pages\BuzzPage methods editPost() You can use the highlightElement method present in CommonMethods file to highlight	Confirms that users can update their shared posts and that those changes persist correctly.
		for the "Proceed" button, please try to keep the page at 75%-80%.	the element before performing any action on it. It takes the locator as a parameter.	

Learners will gain experience in building strongly typed applications using React.js and managing data flow with **TypeScript**. They'll learn how to define interfaces, use types for error prevention, and improve code maintainability. URL https://yakshahrm.makemylabs.in/orangehrm-5.7

App. Key skills include:

- Browser Automation: Interacting with web elements and testing multiple browsers.
- Assertions & Validations: Ensuring app behavior meets expected results.
- End-to-End Testing: Automating real user interactions and validating overall app functionality.

IMPLEMENTATION/FUNCTIONAL REQUIREMENT

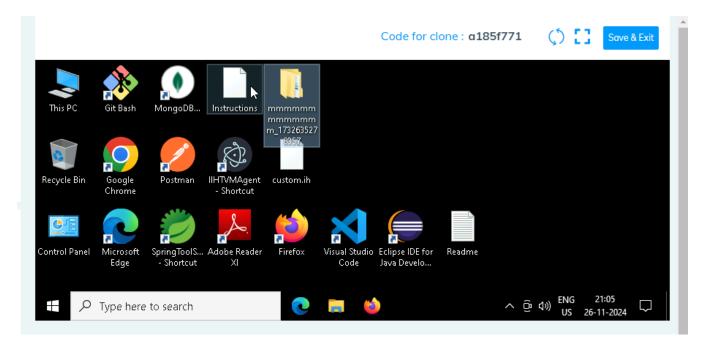

1.1 CODE QUALITY/OPTIMIZATIONS

- 1. Associates should have written clean code that is readable.
- 2. Associates need to follow SOLID programming principles.

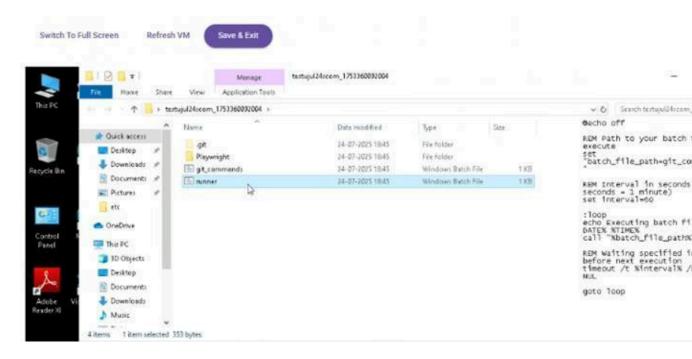

Execution Steps:

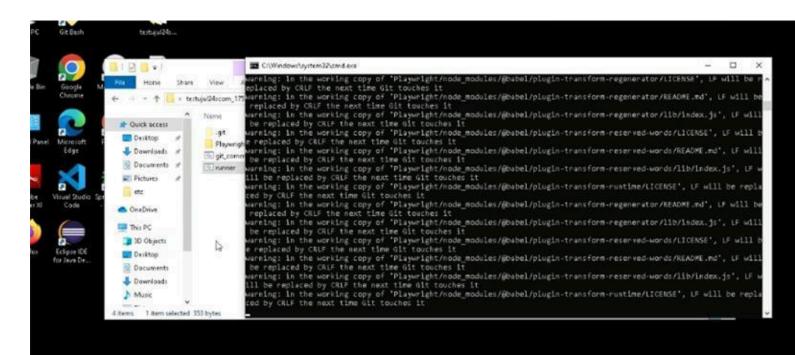

Steps for Execution:

1. Please open the folder created on the desktop with the email name you used to login.

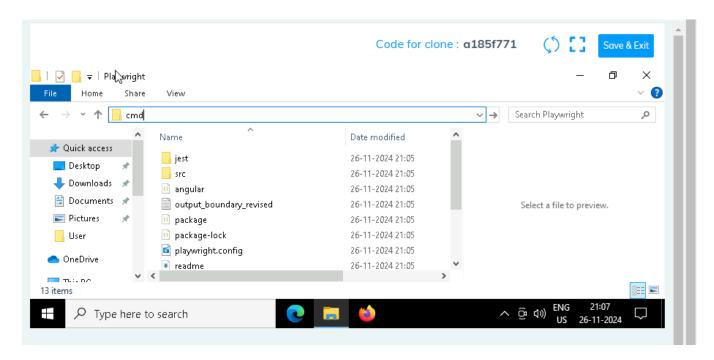

2. Go into the Playwright folder and execute this "runner" file. This will keep pushing the code at

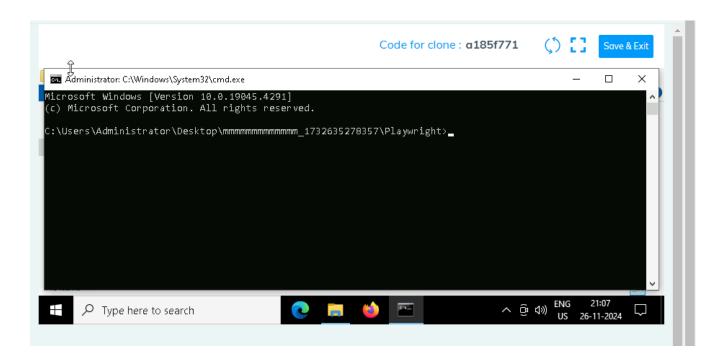

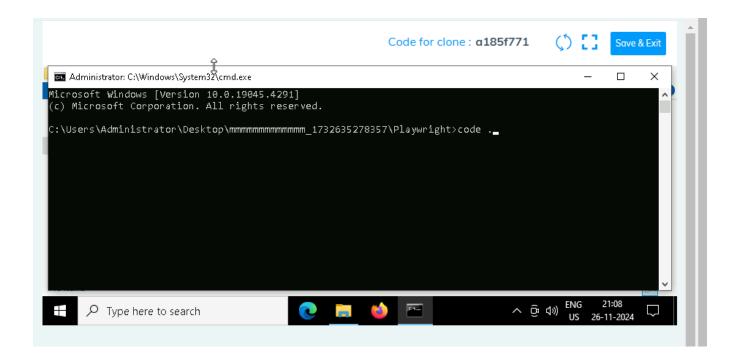

3. Go into the Playwright folder and Open command prompt

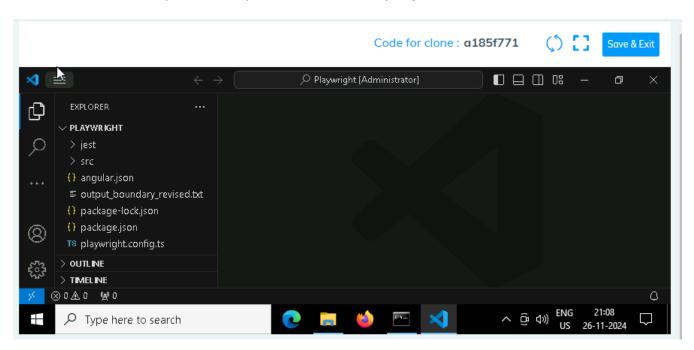

with its location and use the command below: code .

4. Once VsCode is open. Please open the terminal in Playwright folder:

5. Install all dependencies in the Playwright folder

path using: npm install

6. Install playwright in the Playwright

folder path: npx playwright install

7. Run the Tests in the Playwright folder path:

npx playwright test ./src/tests/PL1_testcases/yaksha.spec.ts
